¹ This estimate of "pre-tax price" is a calculation derived from Statistics Canada data on the Canada-wide average price of 200 cigarettes in July 2007. Note that it has not been updated since 2007; it does take fully into account the increase in market share of value and budget cigarette brands; and it does not take fully into account the regional differences in market share of premium, value, and budget brands.

² PST is calculated on the total of pre-tax price + federal excise duty + provincial excise tax.

³ GST/HST is calculated on the total of pre-tax price + federal excise duty + provincial excise tax.
